MUHAMMAD SHOAIB ASGHAR

Full-Stack Developer

Pakistan | +92 309 7190087 | shoaibasghar1515@gmail.com linkedin.com/in/mshoaibasghar | github.com/Shoaib1515 | portfolio-pi-ivory-95.vercel.app

SUMMARY

Software Engineering graduate driven by a genuine love for building things end-to-end from a Python/FastAPI or Node.js backend to a polished Next.js/React frontend, and into Flutter on mobile. Thrives on turning an idea into a working product, owning everything from database design to real-world integrations like SMTP email and third-party APIs. A fast, self-driven learner who reads the docs before asking, and takes real pride in shipping something that works cleanly, not just something that looks finished.

EXPERIENCE

App Developer — Digisol 365, Bahawalpur, Pakistan *Sep 2024 – Oct 2025*

- Designed and built front-end UI screens for client applications, focusing on clean, usable layouts.
- Worked on the backend with Firebase, setting up and checking data flow so features worked correctly end-to-end.
- Tested completed features before release, verifying that both UI and backend behavior worked as expected and catching issues early.
- Handled day-to-day IT support system maintenance, troubleshooting, and network issues alongside development work.
- Coordinated with the team on project timelines and worked directly with clients, gaining experience in managing expectations and scope.

PROJECTS

Personal Portfolio Website — Full-Stack *2026*

- Built and deployed a portfolio with Next.js 16 (App Router), Tailwind CSS v4, Framer Motion, GSAP, and Three.js, including animated 3D elements that respect prefers-reduced-motion.
- Implemented a working contact form end-to-end via a Next.js API route with Nodemailer/SMTP, rather than a plain mailto link.
- Added dark/light theming, a full-screen animated mobile nav, a scroll-progress indicator, and role-specific downloadable resumes.

Crime Investigation Management System — Full-Stack / AI Integration *May 2026 – Jun 2026*

- Built a backend REST API (FastAPI + PostgreSQL) for managing detectives, cases, suspects, evidence, and witness statements.
- Integrated an AI layer that reviews the full case evidence, statements, and crime details together and determines which charges/allegations apply based on what it finds.
- Had the AI pull supporting context via research/sourcing rather than just returning a static answer, backed by database design, validation rules, and features like case threat levels and an AI-generated risk score.

SILI AI Assistant Platform — Full-Stack / AI Integration *Jun 2026 – Jul 2026*

- Built a self-hosted AI assistant with a custom terminal-style frontend, wired to a modular backend so the underlying AI model can be swapped without touching the rest of the app.
- Integrated multiple third-party APIs (Anthropic Claude, Groq, Serper, NVD) behind a clean backend layer, handling live web search and structured data responses.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C#, C++, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Framer Motion, Three.js, GSAP, responsive UI design

Backend & APIs: FastAPI, Node.js, REST APIs, SQLAlchemy ORM

Mobile: Flutter, widget development, responsive UI design

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Python Ecosystem: NumPy, Pandas, Jupyter Notebook

Tools: Git, VS Code, PyCharm, Android Studio, Visual Studio, XAMPP, Anaconda Navigator

EDUCATION

BS Software Engineering — Islamia University Bahawalpur *Sep 2020 – May 2024*

Advanced Python Bootcamp — Excellence Delivered, Lahore *Mar 2025 – Jun 2025*

Web Development Bootcamp — BuiltinSoft, Bahawalpur *Jul 2025 – Dec 2025*

SOFT SKILLS

• Problem Solving • Critical Thinking • Communication • Technical Documentation • Time Management • Team Collaboration • Quick Learner • Adaptability
