MUHAMMAD SHOAIB ASGHAR

Cybersecurity Analyst | *SOC Analyst* | *Security Researcher*

shoaibasghar1515@gmail.com | +923186540421 | Pakistan |

PROFESSIONAL SUMMARY

Cybersecurity and Software Engineering graduate seeking a Cybersecurity / SOC Analyst internship, with hands-on experience in Security Operations, Penetration Testing, Threat Intelligence, Vulnerability Assessment, SIEM, and Web Security. Practical experience deploying and analyzing Wazuh SIEM, Cowrie Honeypot, OWASP ZAP, Burp Suite, Wireshark, Nmap, Nessus, and Metasploit. Solid understanding of MITRE ATT&CK, OWASP Top 10, Incident Response, Log Analysis, Risk Assessment, and compliance standards including ISO 27001, GDPR, HIPAA, and PCI DSS. Proficient in Python, FastAPI, PostgreSQL, SQL, and Linux, with backend development experience that strengthens my ability to understand systems from both a builder's and a defender's perspective. Eager to apply and grow these skills in a real-world SOC / security team environment.

TECHNICAL SKILLS

Cybersecurity: SOC Operations · SIEM (Wazuh, Splunk) · Penetration Testing · Vulnerability Assessment · Threat Hunting · Threat Intelligence · Incident Response · Log Analysis · Digital Forensics (Basic) · Risk Assessment · Security Monitoring · IOC Analysis

Security Tools: Nmap · Wireshark · Burp Suite · OWASP ZAP · Nessus · Metasploit · Cowrie Honeypot · Snort · Kali Linux

Frameworks & Compliance: MITRE ATT&CK · OWASP Top 10 · ISO/IEC 27001 · GDPR · HIPAA · PCI DSS

Programming & Databases: Python · SQL · JavaScript · FastAPI · REST API · PostgreSQL · MySQL

Operating Systems: Linux · Windows

CYBERSECURITY PROJECTS

Wazuh SIEM Deployment and Log Analysis

- Deployed Wazuh SIEM for real-time security monitoring.
- Configured agents, analyzed logs, detected suspicious activities, and generated security alerts.

Honeypot Deployment Using Cowrie

- Implemented an SSH/Telnet honeypot to capture attacker behavior.
- Logged login attempts and analyzed attack patterns.

Social Engineering Simulation Using SET

- Simulated phishing attacks using the Social Engineer Toolkit (SET).
- Demonstrated credential harvesting in a controlled lab environment.

Cybersecurity Awareness Website with Chatbot

- Developed a cybersecurity awareness platform with an interactive chatbot.
- Educated users about phishing, malware, ransomware, and cyber hygiene.

Compliance Policy Research

- Researched ISO 27001, GDPR, HIPAA, and PCI DSS.
- Prepared compliance documentation and security policy recommendations.

Crime Investigation Management System

- Developed a secure backend REST API using FastAPI and PostgreSQL.
- Implemented authentication, database relationships, validation, and AI-based risk scoring.

Jarvis AI Voice Assistant

- Built a Python-based desktop assistant supporting voice commands, automation, and system control.

Online Examination System

- Developed a complete web application using PHP, JavaScript, HTML, CSS, and MySQL.

OTHER EXPERIENCE

Flutter Frontend Developer — *Digisol 365* Jul 2024 – Dec 2024

- Developed responsive mobile applications using Flutter.
- Built modern UI clones and optimized application performance.
- Worked in an Agile development environment; strengthened software engineering fundamentals that support secure development practices.

EDUCATION

BS Software Engineering Islamia University Bahawalpur

CGPA: 3.34 / 4.00

- Advanced Python Bootcamp
- Web Development Bootcamp

CERTIFICATIONS

- ISO/IEC 27001:2022
- SkillFront Information Security Associate™

SOFT SKILLS

Problem Solving · Critical Thinking · Team Collaboration · Communication · Technical Documentation · Time Management · Quick Learner · Adaptability
